WEBSTER type Portable Hardness Tester

WEBSTER WH100
MECHANICAL SHEET & STRIP METAL HARDNESS TESTER

FEATURES

The INNOVATEST® WH Series hand operated **Webster** Hardness Testers are portable instruments which can perform on-site hardness testing on aluminum alloys, brass, copper and soft steel. A quick and easy test, the hardness value can be read out directly on the indicator, with a simple clamp. The measuring procedure complies to the American Standard ASTM B647. Suitable for testing aluminum alloy profiles, tubings and sheet materials. Especially suitable for a fast, non destructive quality inspection on the production site.

The WH Series hand operated **Webster** Hardness Testers feature a fast and comprehensive testing method for testing thin, soft materials. There are several models available for different applications and with different measuring capacity. The Webster hardness values can be converted into the commonly used Vickers, Rockwell and Brinell hardness values. Each tester is packed in a strong industrial box including all standard delivery such as a set of tools, a hardness standard, and a spare indenter.

- One hand operation and portability
- Variety of anvils permits testing a great variance of shapes
- Simple operation permits readings independent of the operator's skill
- Test is made by simply applying pressure to the handles until "bottom" is felt
- Easy-to-read dial indicator with 20 graduations permits use of the tester as "Go" and "No Go" gauge
- Standard hardness gauge tests materials up to 13mm in thickness
